18. Information for New Patients – Your Summary Care Record (SCR)

Dear patient,

Most patients registered with an NHS GP in England have a Summary Care Record (SCR) unless they have chosen to opt out. This is an electronic record that contains important information from your GP health record, including:

- The medicines you take
- Allergies you have
- Any bad reactions to medicines you've experienced

Your SCR helps ensure that other health and care professionals involved in your treatment (e.g. in A&E or out-of-hours services) have quick access to key information, especially in emergencies or when you are unable to communicate.

Your choices about sharing information

You can choose how much information is included in your SCR. Please indicate your preference on the consent form:

- ☐ Express consent – Core information only
(medications, allergies, and adverse reactions)
- ☐ Express consent – Additional information
Includes the above plus significant medical history, care needs, communication preferences, and end-of-life care information (where applicable)
- ☐ Express dissent (opt-out)
No information will be shared via the Summary Care Record

If you do not indicate a preference, a core SCR will be created by default (medications, allergies, adverse reactions only).

You can change your preference at any time by speaking to your GP practice.
